UNILUXEMBOURG

Job Application

Dear,

I am pleased to be applying for this RD Specialist (Software Developer) in Neuromorphic Computing position as I believe that I possess everything necessary to execute the role and all associated duties successfully.

My name is Fabio Battaglia and I am a dedicated and passionate engineer with a strong determination to build innovative products and services. I strongly believe that all complex goals are reachable with good design and constructive team work. As a Lead Software Engineer for Space Services at Spire Global, I lead the development of high-performance, scalable software solutions critical to our satellite data and analytics services. My role involves designing robust software architectures, leading a team of engineers, and collaborating with cross-functional teams to deliver integrated solutions. I have extensive experience in API and microservices development, cloud integration, and managing automated deployment processes. My commitment to innovation and quality assurance drives successful projects that enhance Spire Global's space service offerings.

I graduated with a master's degree in Automation Engineering and Robotics and a bachelor degree in Software Engineering cum laude at the University of Catania, Italy. I have direct experience with all applications and coding languages required in the job description, I believe that I am an ideal candidate for the position not just for the technical side, but because I feel I can contribute to the team spirit and culture. Finally, I have attached my up-to-date CV for your review so please do not hesitate to contact me if you have any questions on my career history.

Thank you for your time and consideration and I look forward to speaking with you in the near future.

Sincerely,

Fabio Battaglia
